Fighting Corruption
DEMOCRACY
Pentagon Marines
Cybersecurity
ENTREPRENEUR
American Dream FAMILY

From Our Community to Afghanistan, from Silicon Valley to the State Department,

Peter Dixon Has Always Fought for Our Democracy

Peter as a child with his family

Peter grew up in our community in a family with a proud history of public service.

Peter and Gina with their daughters

Peter volunteering in Kenya

Peter spent a year in Kenya volunteering for a nonprofit to reduce ethnic violence and raising money to build a hospital that provides critical maternal care and fights HIV/AIDS.

Peter with his mom while on leave from service in Afghanistan

When terrorists attacked our country on 9/11, Peter knew it was his time to put his life on the line for our freedom and democracy. He joined the Marines and served in Afghanistan and Iraq, became an intelligence officer, and served in the Pentagon.

Peter in the U.S. Marine Corps

Peter went on to serve under Secretary Hillary Clinton in the State Department fighting corruption and drug cartel violence in Mexico and violence against women.

Peter at a cybersecurity summit

Peter founded a successful cybersecurity firm that helps software companies working with the federal government navigate expensive security requirements, leveling the playing field for start-ups, allowing them to compete and innovate while saving millions of dollars.

Now,
Peter is running for Congress to stop Donald Trump and MAGA Republicans from taking away our rights and destroying the democracy he swore an oath to protect as a Marine.

Peter is the leader we can trust to:

Defend our reproductive freedom and stop Trump and MAGA Republicans from banning abortion nationwide

Keep us safe by banning assault weapons and implementing universal background checks and safe storage laws

Fight climate change by investing in renewable energy

Make the American dream of owning a home affordable for everyone

Vote Democrat PETER DIXON for Congress

EARLY VOTING Starts February 6
PRIMARY ELECTION Day Is March 5
